

## WL250

### Wheel Loader

#### Compact and powerful

The WL250 wheel loader has an overall lower height and compact dimensions. As a result, the machine can pass through clearance heights of below 78.74 in without the need to fold down the operator's canopy. The machine's low center of gravity ensures very good stability and allows the handling of heavy loads. The wheel hub drive also includes the powerful and efficient drive concept, with which all four wheels are directly driven. This purely hydraulic wheel hub drive ensures an increase in efficiency, excellent acceleration, and therefore enables a responsive driving behavior as well as high thrust power.

### Highlights

- Powerful wheel hub drive
- Construction height under {2 m}{78.7 in}
- Compact dimensions for optimal maneuverability
- Easy entry and exit
- Engine without exhaust after-treatment
