

DT15

Track Dumper

Maximum application power

The DT15 is the ideal transporter on the construction site for extensive work. The large skip selection combined with the comfortable and intuitive hydrostatic drive system as well as the high payload make it the perfect versatile material handler. The single-piece engine hood and the optimal arrangement of the service points also make daily maintenance much easier, saving time and effort. The low center of gravity makes it a trustworthy partner in material transport, even with a high load.
