

## PTS4V

### Self-priming wastewater pumps of the PT series

Ideal for a variety of application options

The self-priming centrifugal pump PTS4 is an excellent choice for demanding dewatering tasks. The sturdy Vanguard engine with electric starter provides reliable performance. The pump is suited to both clean and sludgy, dirty, sandy or gritty water. Thanks to the impeller, made of surface-hardened ductile iron, and the mechanical seals, made of carbon-ceramic, the pumps is extremely wear-resistant in the oil pan, and exhibits a long operational duration with minimal maintenance necessity. As a result of its light construction, a central lifting eye, and an integrated wheel set, the pump is particularly easy to transport and to handle.
