DT08 Track Dumper

5 years /
5,000 hours
warranty

The rental / hire professional

With its 800 kg payload and only 79 cm machine width, the DT08 is the perfect fit for rental fleets. The low-maintenance and intuitive-to-operate hydrostatic drive system allows simple operation, even for inexperienced operators. At the same time, it is gentle on the subbase due to its wide tracks and the perfectly balanced center of gravity with low ground pressure. The sturdy travel gear design ensures durability and low wear.

Hydrostatic drive

Simply start and off you go: Because of the hydrostatic drive system, no frequent gear changing is needed and the operator can focus on the task. The hydraulic drive system and the working hydraulics can be operated independently of each other.

Small dimensions

The compact dimensions of the machine make it ideal for manoeuvring and working in confined spaces.

Track width

Due to the wide tracks, the machine produces very low ground pressure, which reduces ground disturbance during repair work. This also leads to a more comfortable and smoother driving experience and protects the machine and operator.

Technical Information

	Units	DT08
Hydraulic		
Hydraulic pump		ZRP
Flow rate	l/min	41
Mechanical - Output Details		
Travel speed	km/h	4
Mechanical Details		
Length	mm	1,660
Width	mm	790
Height	mm	1,203
Payload	kg	800
Skip		Front tip skip
Skip capacity levelled	l	334
Skip capacity heaped	l	387

	Units	DT08
Operating weight (min.-max.)	kg	595 - 710
Engine		
Motor type		Diesel
Cylinder		1
Cylinder capacity	cm3	435
Effective power	KW	6.8
Nominal engine speed	1/min	3,600
Manufacturer		Yanmar
Engine designation		L100AE
Stroke	mm	75
Bore	mm	86
Shipping and Storage		
Shipping weight	kg	520
