

EZ26e

Tracked Zero Tail Excavator

Energetic powerhouse: electrify your everyday working life.

The EZ26e redefines the future of excavator operation. It offers maximum performance, comfort and environmental friendliness. Its impressive design and innovative technology enable it to excel in the most demanding applications. From landscaping to interior demolition, from urban environments to noise-sensitive areas - the EZ26e is a versatile powerhouse. The EZ26e is not just an excavator, but a solution for the future of construction. Its emission-free, quiet and low-vibration operation makes it the ideal choice for legally restricted areas, noise-sensitive and environmentally sensitive areas as well as for niche areas where there are local and time restrictions. Thanks to its ability to be charged from a standard household socket to high voltage and its long operating time throughout the working day, the EZ26e offers unbeatable flexibility and productivity. Its large display provides all important machine data directly in the operator's field of vision, while additional features such as a programmable parking heater, low vibrations and low weight ensure optimum comfort and efficiency.
