Track Dumpers

Front-tip, Swivel-tip and 3-way-tip Skips

Confined area material handling

Track dumpers are the ideal material handling solution for smaller jobs that need the advantages of a tracked machine. The mini-track dumpers can fit through narrow garden gates and doorways, making them an excellent choice for confined area landscape, concrete, demolition and residential applications.

Performance driven

Track dumpers can travel and maneuver across rough terrain and over curbs. The suspension-mounted rollers adapt to the terrain for a smoother ride.

Performance

- Hydrostatic drive provides for easy and comfortable operation – no need to change gears
- Rubber tracks and optimal weight distribution reduces ground pressure to prevent damage on sensitive surfaces and provides added stability
- Suspension-mounted rollers compensate for uneven ground and provide for a smoother ride on rough terrain and over curbs or steps.

Efficiency

- Compact dimensions are ideally suited for maneuvering and working in confined areas.
- Quickly unload materials with precision with choice of front-tip, swivel-tip or 3-way side tipping platform (depending on model)

Maintenance

- Engine hood can be folded down for complete access to daily maintenance points for quick and easy servicing

Performance Data

	Unit	DT08 Gasoline, front tip	DT10 Diesel, Front tip with self-loading shovel	DT10 Diesel, Swivel tip	DT10 Diesel, Front tip platform	DT15 Diesel, 3-way side-tipping platform	DT15 Diesel, swivel tip
