

FUH70/6/42s

Portable frequency converters

Reliable performance at light weight

The FUH series offers compact, lightweight frequency converters for concrete processing with extremely reliable and stable performance, even in continuous operation. Thanks to the use of high-frequency technology, they are significantly lighter than electronic converters and therefore particularly convenient to transport. They are completely maintenance-free and are suitable for the operation of internal and external vibrators. The frequency adjustment allows an exact adaptation of the external vibrators to the respective formwork. The FUH can thus be used to produce perfect concrete surfaces.
