

G14

Mobile Generator

The bridge between the portable and mobile generator

The G14 is a single phase 13.5 kW mobile generator designed for job sites where fuel economy and long run times are necessary. The programable controller allows for customization along with maintenance reminders and alarms for ease of use. Serviceability of the machine is made easy by the access through the removable doors and single side service. The compact footprint along with the folding tongue minimizes transportation which allows for maximizing storage space.

Highlights

- G14 Long Run Time
