

## TH627

### Telehandler

Maneuverable and effective.

If stacking heights of 6 meters are involved, the telehandler TH627 is the ideal solution. With a payload of 2.7 metric tonnes, it remains stable even during extreme loading processes. The numerous option variants make the TH627 a real all-rounder on the construction site. With two cabin variants, the vehicle offers a low overall height or, with the high cabin, an even better all-round visibility.

### Highlights

- Choice between two cab heights.
