Track Dumper

The powerful and high-performance track dumper

Powerful in application, easy on the subbase and unlimited off-road: the DT23 is a powerhouse that manages every application because it is both maneuverable and powerful. The optional auxiliary hydraulics for the two-stage drive system and the connection of external units such as breakers or concrete mixers make it versatile on every construction site. Due to the sensitive hydrostatic drive system, even inexperienced operators can find their way quickly with the dumper. With its well-coordinated components, the DT23 offers excellent tractive force with simple technology for easy maintenance.
