

TH412e

Telehandler

Electric, environmentally-friendly, and powerful

The Th412e is the first pure electrically-operated telehandler by Wacker Neuson. Its power ratings correspond to those of a conventional diesel-operated machine. The installed 96-Volt lithium-ion battery is available in two power ratings so that the running and charging times can be optimally coordinated with the work requirements. The TH412e works on-site completely free from exhaust gases and with significantly lower noise emissions. For the end user, this means greater flexibility in application, environmental protection and significant savings with operating costs. As a result, features such as compact dimensions, all wheel steering, low center of gravity, and excellent stability are likewise true of the electrically-driven machine.

■ Other information

*The charging time is dependent on the different charging options. On-board charger 3 kW (standard) with additional charger total 6 kW (option). The following charging plugs are available: 230 V / 10 A Schuko, 230 V / 16 A CEE (blue, 3-pole), 400 V / 16 A CEE (red, three-phase current, 5-pole), 400 V / 16 A (type 2 wallbox plug, IEC 62196) and other adapter plugs.

**The battery's running times are dependent on the respective application conditions, the work task, and the operating mode. This can also mean that a longer running time can be achieved. In extreme cases, it is also possible to fall short of the specified running times. The specified running times relate to uninterrupted operation and working with the machine.
