## 3106

### Telehandler

#### THE COMPACT POWERHOUSE

With its combination of compact external dimensions and a high payload and engine power, the 3106 telehandler is the compact powerhouse in the Kramer portfolio. The telehandler lifts up to 3,100 kg to a maximum stacking height of 5.83 m. The Deutz engine with a maximum output of 82 kW / 112 hp ensures high machine agility and performance. The extensive standard equipment includes a top speed of 40 km/h, a reversible fan with automatic function and four steering modes with automatic synchronization.

**Engine:** Powerful Deutz 2.9 liter engine with a maximum performance of 82 kW (112 hp) ensures maximum productivity for demanding tasks

**Compactness:** Height of 2.15 m and width of 2.09 m for applications in confined spaces

**Charging capacity:** Continuous 3,100 kg payload up to a maximum stacking height of 5.83 m ensure that heavy loads are moved safely and efficiently

**Weighing system:** Optional, integrated, dynamic weighing system, which enables different goods to be weighed regardless of attachment, load center of gravity and the position of the loading system

**Smart Attach:** Hydraulic attachments can be changed quickly, simply, and safely as a result of the optional fully hydraulic quick change plate
