

DW15

Wheel Dumper

The perfect symbiosis between compact power and the highest safety requirements

The DW15 dumper was specially developed for use on confined construction sites. Thanks to its compact design, the DW15 is easy to maneuver in tight spaces, while its high stability ensures stability even on difficult surfaces. The DW15 is available with both a swivel and a high-tipping skip, which offers additional flexibility for various application scenarios. Safety features are the top priority for this dumper: The steps on both sides are designed in signal color and have wide steps that make it easier to get on and off. An acoustic reversing alarm provides additional protection against accidents on the construction site. With its powerful engine and optimized access to all service points, the DW15 is ideal for intensive work applications where ease of maintenance and efficiency are required. The DW15 combines high safety, performance and maneuverability and is therefore the ideal solution for projects in small spaces where a high payload is still required.
