

RD24e-100c

Electric tandem roller

Comfortable, efficient, and emission-free

The RD24e has an electrically driven vibration and/or oscillation unit. As a result, compaction works can be performed emission-free without cutting corners in terms of performance. The three-point articulated joint ensures an equal weight distribution with optimal maneuverability and operational stability. The operator benefits from intuitive operation, as well as the extensive view of the compaction area. The compact dimensions make the RD24e an all-rounder for the construction site.

Highlights

- No exhaust emissions
- Uniform operating concept
- Large line-of-sight, compact construction
